                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     င်
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    QQ
                A; Experimental source: seed C. Comment: This enzyme is a exo-glucohydrolase that catalyzes the hydrolysis of alpha-gl C; Comment: This enzyme is a exo-glucohydrolase; sucrase/isomaltase homology; trefoil homolog C; Superfamily: lysosomal alpha-glucosidase; sucrase/isomaltase homology; trefoil homolog C; Keywords: glycosidase; hydrolase F;149-803/Domain: sucrase/isomaltase homology <SIM>
                                                                                                                                                                                                                                                                                                     113

A; Title: Molecular cloning, sequencing, and expression of a cDNA encoding alpha-gluco A; Reference number: JC4624; MUID:96271012; PMID:8830045
A; Recession: JC4624
A; Molecule type: mRNA
A; Residues: 1-864 < 8001.
A; Residues: 1-864 < 8001.
A; Residues: 1-864 < 8001.
A; Residues: 203-214; 492-495; 612-623; 715-731; 742-751; 769-778 < 8002.
A; Residues: 203-214; 492-495; 612-623; 715-731; 742-751; 769-778 < 8002.
A; Residues: 203-214; 492-495; 612-623; 715-731; 742-751; 769-778 < 8002.
A; Residues: 203-214; 492-495; 612-623; 715-731; 742-751; 769-778 < 8002.
A; Residues: 203-214; 492-495; 612-623; 715-731; 742-751; 769-778 < 8002.
A; Residues: 203-214; 492-495; 612-623; 715-731; 742-751; 769-778 < 8002.
A; Residues: 203-214; 492-495; 612-623; 715-731; 742-751; 769-778 < 8002.
A; Note: the source is designated as Mucor javanicus IF04570
C; Comment: This encryme is an exo-carbohydrase, and catalyzes the splitting of an alph.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      US-08-430-925A-4

Sequence 4, Application US/08430925A

Patent No. 5763252

GENERAL INPORMATION:

APPLICANT: Skadesn, Ronald W

APPLICANT: Tibbot, Brian K

TITLE OF INVENTION:

CORRESPONDENCE ADDRESS:

ADDRESSE: Quarles & Brady

STREET: Madison

STREET: Jouth Pinckney Street

CITY: Madison

STREET: US

COUNTRX: US

ZIP: 53703

COMPUTER READALE FORM:

MEDIUM TYPE: Floppy disk

COMPUTER: IBM PC compatible

OPERATING SYSTEM: PC-DOS/MS-DOS

SOFTWARE: PatentIn Release #1.0, Version #1.30

CURRENT APPLICATION DATA:

APPLICATION NUMBER: US/08/430,925A

FILING DATE:

CLASSIFICATION NUMBER: 27,386

RECISTRATION NUMBER: 27,386

REFERENCE/DOCKET NUMBER: 37,386
